

To Whom It May Concern

Having been the Centre Manager of the Broome Recreation and Aquatic Centre during the installation and first 18 months of use of our Greensafe Retractable Shade, I can confirm this has been a great decision by our Shire.

The installation process was carried out quickly (on time) and with minimal disruption to our Centre's operations. Barry and his team maintained a very safe working environment throughout the whole process.

The shade itself has proven to be a huge success with the users of our pool. Not only does it protect our users from the sun's harmful rays but has reduced the amount of chlorine we use each year and has maintained the pool temperature at a much more enjoyable level. For myself as Manager, the reduce risk associated with erecting and removing the old shade system is worth the cost alone. I would thoroughly recommend that Pool Managers and their Elected Members should give serious consideration to a retractable shade structure.

Regards

Ian Chester
